I'll never Speak Spanish

That's what I used to think. Until I discovered this.
shortcuttospanish.com

Going on a trip? Croatia? Sounds nice. No need to worry about your itinerary, just bank on recommendations based on the experiences by people who have already been there using Minube's Android app.

What does it do?

Tells you what to see, where to eat, where to go, and where to stay, and gives you user-generated pictures of the places you'll see on your future trek.

Why do we like it?

Because it's like Yelp for travel that works for destinations all over the world, written by more than half a million users. Who better to tell you what to see than the seasoned travelers who've already braved the place you're headed? Add your

picks to a "saved" page, or if you're lazy, you can pull from set lists like "What to See in Paris in Three Days," or "The Best Tapas in Barcelona," and just follow those guides. Now you just have to file that vacation request.

Minube

Download this app for:

Shame this app isn't available for iPhone.

And damn.. never thought I'd say those words.

The Best:

Pre-set

itineraries

The Worst:

The unknown

Hi Daekwan, it is available for iPhone at minube.net/iphone :)

Chode-Boi > Leslie Horn

1/22/13 6:38pm

Beware where untraveled travelers trod and turn to tell tales of tourist traps whence they tarried.
